

App Interface & Features

Machine Learning, YouTube, PDF

This app will allow user to study and learn in a more interactive way. No more need to swap between YouTube and PDF to learn better. Also no use to search the keywords which will help you learn better, SmartPDFReader has it all under one roof. This app suggests you the keywords which will help you learn better and these words will be suggested by the Google Natural Language Machine Learning API. Besides this, SmartPDFReader also suggests the YouTube videos that will give you a greater insight of the topic. Our work is done with the utmost attention to detail, and is focused on a beautiful, fully functional, and user friendly final result.
